

6. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?(2012 수능 21 번)

Researchers studied two mobile phone companies trying to solve a technological problem. One company developed what it called a 'technology shelf,' created by a small group of engineers, on which ① was placed possible technical solutions that other teams might use in the future. It also created an open-ended conversation among ② its engineers in which salespeople and designers were often included. The boundaries among business units were deliberately ambiguous because more than technical information was needed ③ to get a feeling for the problem. However, the other company proceeded with more seeming clarity and discipline, ④ dividing the problem into its parts. Different departments protected their territory. Individuals and teams, competing with each other, stopped sharing information. The two companies did eventually ⑤ solve the technological problem, but the latter company had more difficulty than the former.
